Summary

Computer Science student with a strong interest in Cloud Computing, AI, Platform Engineering, and scalable infrastructure systems. AWS Certified Solutions Architect – Associate with hands-on experience in cloud technologies, containerization, CI/CD workflows, and cloud-based application deployment using AWS, Docker, and Kubernetes. Experienced in building AI-powered and cloud-native projects while exploring Linux systems, infrastructure automation, and modern cloud technologies. Passionate about learning distributed systems, AI infrastructure, platform engineering, and reliable software systems that support large-scale applications and intelligent workloads.

Education

K L University

B.Tech in Computer Science and Engineering — CGPA: 9.68

2023 – 2027

Hyderabad, India

SSR CBSE School

Intermediate (Class 12) — Math, Physics, Chemistry — 63%

2021 – 2023

Hyderabad, India

Internship

National Institute of Technology Warangal (NIT-W)

Nov 2025 - Jan 2026

AI/ML Intern — Cancer Prediction

Remote, India

- Developed a **cancer prediction system** using Machine Learning and Deep Learning models for early-stage diagnosis.
- Implemented and optimized **Logistic Regression, Random Forest, and Neural Networks**, improving model performance through systematic experimentation.
- Applied **feature engineering, hyperparameter tuning, and cross-validation** to enhance model accuracy and generalization.
- Evaluated models using **precision, recall, and F1-score**, ensuring robust and reliable predictions.

Projects

S3 Based Cloud File Storage System

Python, Streamlit, AWS S3, Cloud storage

- Developed a cloud-based file storage system using Streamlit and AWS S3 for secure and scalable file management.
- Implemented file upload, view, and delete functionalities through an interactive web interface.
- Integrated AWS S3 Bucket as permanent backend cloud storage to store and manage uploaded files efficiently.
- Designed a user-friendly interface for real-time file handling and cloud storage operations.

AI Study Companion — RAG-Based Learning Assistant

Python, LangChain, Chroma, Streamlit, OpenAI API

- Developed an AI-powered study assistant that enables students to upload academic PDFs and interact with course materials using Retrieval-Augmented Generation (RAG).
- Implemented document chunking, embeddings, semantic search, and vector retrieval to provide context-aware answers from uploaded study resources.
- Built automated quiz generation, topic summarization, and exam-focused question extraction features to support personalized learning.
- Integrated a vector database for efficient storage and retrieval of document embeddings, improving response relevance and retrieval speed.
- Designed an interactive Streamlit interface for PDF upload, question answering, and study-material generation.

Technical Skills

- Programming Languages:** Java, Python (Basic), SQL, C++ (Basics)
- System Programming & OS Concepts:** Operating Systems, OOPs, Process Management, Multithreading Basics
- Linux & Virtualization:** Linux (Ubuntu), Shell Scripting Basics, Containerization Concepts, Virtualization Fundamentals
- Backend Development:** Java, REST APIs, Flask, Spring Boot (Basics)
- Cloud & Infrastructure:** AWS (EC2, S3, IAM, VPC, EKS, CloudWatch), Docker, Kubernetes, CI/CD
- Version Control & Automation:** Git, GitHub, GitHub Actions, Jenkins
- Networking Concepts:** TCP/IP, DNS, HTTP/HTTPS, OSI Model, Load Balancing, Client-Server Architecture
- Monitoring & Observability:** Prometheus, Grafana, CloudWatch
- Database Technologies:** MySQL, MongoDB
- Core CS Fundamentals:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Certifications

AWS Academy Graduate - Cloud Architecting - Training Badge

Amazon Web Services

AWS Certified Solutions Architect - Associate

Amazon Web Services

Automation Anywhere Certified Advanced Automation Professional

Automation Anywhere

MongoDB Associate Developer – MongoDB University

MongoDB University

AWS Certified Cloud Practitioner

Amazon Web Services
